Senior Front-End Engineer

PROFESSIONAL SUMMARY

Senior Frontend Engineer with 5 years of experience architecting and building web applications using SvelteKit, Svelte, TypeScript, and TailwindCSS. Proven expertise in component-driven development, design system architecture, and scalable frontend infrastructure. Track record of delivering fast, accessible, and maintainable user interfaces with strong focus on code quality and performance optimization.

TECHNICAL SKILLS

- **Core Technologies:** Svelte, SvelteKit, Svelte 5 (Runes), TypeScript, JavaScript (ES6+), TailwindCSS, HTML5, CSS3
- **Frontend Architecture:** Component-Driven Development, Design Systems, State Management (Svelte Stores & Runes), Performance Optimization, Bundle Size Management, Accessibility (WCAG)
- **Build Tools & Testing:** Vite, Playwright, Vitest, Automated Testing (Unit & Integration), Storybook
- **API Integration:** RESTful APIs, GraphQL, WebSockets
- **DevOps & Tooling:** Git, GitHub Actions, CI/CD Pipelines
- **UX & Design:** Figma to Code, Component Libraries, Responsive Design, Layout Systems (Flexbox & Grid), UX-first design
- **Additional:** Node, Bun, Drizzle ORM, D3.js, CSS Animations, GSAP, Motion One, Supabase, Firebase, Kotlin

PROFESSIONAL EXPERIENCE

Frontend Engineer | Obot AI (Remote)

March 2025 – Present

- Architected frontend features for Obot AI using SvelteKit, TypeScript, and TailwindCSS-built reusable components that accelerated feature delivery
- Developed type-safe UI components and D3.js visualizations, refactored legacy code for better performance and better user experience
- Integrated RESTful APIs with proper error boundaries and loading states
- Conducted code reviews and maintained documentation to establish quality standards as the codebase scales

Frontend Engineer | Aeris Secure (Remote)

January 2024 – March 2025

- Architected and refactored a legacy Svelte application achieving improved load times by 30% and reduced bundle size by 20% through better code splitting
- Created a design system with 30+ reusable components (Svelte + TypeScript + TailwindCSS) based on custom Figma design that cut development time by 30% and reduced code duplication by 50%
- Integrated GraphQL API to handle real-time data updates and managing async state properly
- Owned features end-to-end from architecture through development, deployment, monitoring, automated testing and CI/CD workflows

Frontend Engineer | Self-Employed (Remote)

March 2021 – January 2024

- Built high-performance web apps, real-time interfaces including interactive dashboards and data visualizations using D3.js and modern animation libraries
- Connect various APIs (REST, GraphQL & WebSocket) and integrate with framework's state management API
- Integrated component libraries and design systems with TailwindCSS, improving development efficiency and code consistency
- Translated Figma mockups into production code and collaborated with designers to refine interactions and responsive behavior

OPEN-SOURCE CONTRIBUTIONS

Lead Developer & Maintainer – Svelte Atoms UI Library | github.com/svelte-atoms/core

- Architected component library for Svelte 5 based on atom & bond patterns for optimal scalability and extensibility
- Developed 40+ modular, reactive components with TypeScript, TailwindCSS and extensive customization options
- Implemented responsive layouts, accessibility standards (ARIA), and improved tree-shaking for modern bundlers
- Handled the full lifecycle: writing components, tests, docs, answering issues, cutting releases

Lead Developer & Maintainer – Fluent UI for Svelte | github.com/svelte-fui

- Ported Microsoft's Fluent Design System to Svelte; gave developers a way to build apps that match Windows 11 aesthetics
- Created fast, lightweight, accessible components using Svelte, TypeScript, and TailwindCSS with focus on performance optimization
- Enabled visual consistency and development efficiency across enterprise projects through reusable component architecture

EDUCATION

Master of Science in Software Engineering | Constantine 2 Abdelhamid Mehri University, Algeria

2017 – 2019

Bachelor of Science in Software Engineering | Constantine 2 Abdelhamid Mehri University, Algeria

2014 – 2017
